EDUCATION

Georgia Institute of Technology, 4.00/4.00 GPA
Bachelor of Science in Computer Science

Atlanta, GA
August 2020 – May 2024

EXPERIENCE

Beeline (@Nike)

Software Engineer Contractor

Beaverton, OR
September 2024 – Present

- Contributed core logic to the Nike Platform Engine Terraform provider, enabling seamless integration of Crossplane schemas into IaC workflows.
- Led implementation of a customer-facing component restart feature by coordinating updates across the Crossplane stack, internal REST API, CLI tooling, and end-to-end test suite.
- Migrated log collection infrastructure from Splunk Connect for Kubernetes to an OpenTelemetry (OTEL) collector stack, boosting throughput from 4k to 25k logs/sec via a custom Kubernetes operator, CRDs, and performance benchmarking.

Bubble Social

Co-founder and Lead Software Engineer

Beaverton, OR
July 2024 – Present

- Engineered a highly scalable location-based social media platform, integrating real-time features and mutual friend discovery using a custom PostgreSQL schema and RPC-driven API via PostgREST.
- Migrated backend logic from Firebase to PostgreSQL, reducing query latency on high-cost recommendation and location queries by over 1060%.
- Implemented a JWT authentication system that interfaces with the client and PostgreSQL.
- Built a performant and responsive frontend with React, Vite, and Mapbox GL, implementing dynamic clustering to support rendering of over 10,000 map markers tied to real-time user data.

Nike, Inc.

Software Engineer Intern

Beaverton, OR
June 2024 – August 2024

- Orchestrated Kubernetes deployments using Crossplane compositions and composite resource definitions to automate resource management across tenant clusters and ensure high availability.
- Integrated lifecycle hooks into Kubernetes Crossplane composition and Nike platform engine's REST API using Go, increasing resiliency and observability of components.
- Utilized KUTTL to rigorously test changes on a control plane architecture to confirm stability and reliability.

Software Engineer Intern

June 2023 – August 2023

- Migrated Google Cloud Platform project provisioning to Nike's central cloud provider management application, reducing project configuration time by 40%.
- Implemented an asynchronous workflow to configure IAM policy bindings, service account permissions, and SSO integrations, streamlining access management.
- Engineered a testing framework with JavaScript and Python for Google Cloud Platform project creation, eliminating an error affecting 80% of prior projects.

Georgia Tech Contextual Computing Group

Undergraduate Research Assistant

Atlanta, GA
January 2023 – May 2024

- Built a full-stack web app in Dr. Thad Starner's passive haptic learning lab to integrate with wearable piano-training gloves.
- Awarded 3rd place for best poster presentation at the 17th Annual Georgia Tech Undergraduate Research Symposium.

ORGANIZATIONS

Big Data Big Impact @ Georgia Tech

Platform Lead (Club Officer)

Atlanta, GA
August 2022 – May 2024

- Ran interactive workshops and demos on distributed software development technologies with 50+ participants.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, TypeScript, HTML/CSS, Java, Go, R

Technologies: Git, AWS Services, Docker, Kubernetes, Crossplane, ArgoCD, React, Node.js, Valgrind, GDB, Linux, Elasticsearch

Concepts: Data Structures, Algorithms, Object-Oriented Programming, Computer Organization, Agile Methodologies and Design Principles, Database Systems, Intro to AI, Networking, Machine Learning, Computer Vision
