EDUCATION

Georgia Institute of Technology, 4.00/4.00 GPA
Bachelor of Science in Computer Science

Atlanta, GA
August 2020 – May 2024

EXPERIENCE

Nike, Inc.

Beaverton, OR

Software Engineer Intern

June 2024 – August 2024

- Orchestrated Kubernetes deployments using Crossplane compositions and composite resource definitions to automate resource management across tenant clusters.
- Integrated lifecycle hooks into Kubernetes Crossplane composition and Nike platform engine's REST API using Go, increasing resiliency and observability of components.
- Utilized KUTTL to rigorously test changes on a control plane architecture to confirm stability and reliability.

Software Engineer Intern

June 2023 – August 2023

- Migrated Google Cloud Platform project provisioning to Nike's central cloud provider management application, reducing project configuration time by 40%.
- Implemented an asynchronous workflow to configure IAM policy bindings, service account permissions, and SSO integrations, streamlining access management.
- Engineered a testing framework with JavaScript and Python for Google Cloud Platform project creation, eliminating an error affecting 80% of prior projects.

Georgia Tech Contextual Computing Group

Atlanta, GA

Undergraduate Research Assistant

January 2023 – May 2024

- Developed gloves in Dr. Thad Starner's passive haptic learning lab to accelerate piano skill acquisition.
- Created an analytical dashboard using Chart.js for users to track their progression over time via a web portal.
- Awarded 3rd place for best poster presentation at the 17th Annual Georgia Tech Undergraduate Research Symposium.

Streem, Inc.

Remote

Software Engineer Intern

May 2022 – August 2022

- Implemented end-to-end tests for a video call system using WebdriverIO framework to ensure application reliability.
- Composed a TypeScript script to validate simultaneous localization and mapping algorithms and RealityKit scenes.
- Designed 20+ multi-platform asynchronous mobile tests using BrowserStack, improving performance across iOS and Android devices.

OHSU Department of Medical Informatics and Clinical Epidemiology

Portland, OR

Data Science Intern

May 2021 – September 2021

- Filtered data sets from the N3C COVID-19 database containing over 6 million rows with R, Python, and SQL.
- Utilized SparkR for distributed data processing to deal with large-scale datasets, reducing processing time by 45%.
- Developed data visualization templates for researchers, including a single-date frequency plot split among data partners.

ORGANIZATIONS

Big Data Big Impact @ Georgia Tech

Atlanta, GA

Platform Lead (Club Officer)

August 2022 – May 2024

- Led a team of 15 students in developing a predictive crop yield model to help growers maximize profits.
- Ran interactive workshops and demos on distributed software development technologies with 50+ participants.

PROJECTS

Spotlight Portfolio | nathanaeng.com

January – March 2023

- Built a responsive web application using React to enable users to quickly find information about me.
- Used AWS Lambda, API Gateway, and OpenSearch with prefix, multi-match queries for a live search results experience.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML/CSS, Java, R

Technologies: Git, AWS Services, Docker, Kubernetes, React, Node.js, Valgrind, GDB, Linux, Elasticsearch, Kibana, VirtualBox

Concepts: Data Structures, Algorithms, Object-Oriented Programming, Computer Organization, Agile Methodologies and Design Principles, Database Systems, Intro to AI, Networking, Machine Learning, Computer Vision
